Over the last 23 years, Bradley R. Cross' company, Harmony Hollow, has created a selection of hundreds of original designs for the landscape. These designs include bronze bells (windbells, doorbells, dinner bells), windchimes (tubular and rodular), mobiles (with bells and without), garden glyph stakes, and low voltage landscape lights. All Harmony Hollow designs are constructed of high quality durable bronze, brass, and copper. Most designs incorporate the beautiful verdigris patina that Cross has developed on the durable non-ferrous metals.

Pictured is a mobile with petroglyph images in brass with a retail price of \$100. These are also available in smaller and larger sizes as well as different motif themes. The house sign is one of many possibilities incorporating the bronze windbell, brass sculpture and etched glass identification plaque which retails for \$500. The low voltage landscape path lights are available in numerous original bronze designs and retail from \$200.

Call about commissions. Bradley enjoys the collaborative process. Color brochure available.
