H. DOLIN STUART

Battista Cocktail Table

H. DOLIN STUART
The dynamic, intersecting shapes of the Battista Cocktail Table seem to dance to a rhythm all their own, while the slotted disc anchors the glass top above the sculptural form. This table is one of the latest in a series of designs by Pucci De Rossi, one of France's leading furniture artisans, and each piece bears his signature.

Fabricated in 1/2 in. thick steel, the Battista stands 24 in. high and can accommodate a glass top up to 24 inches in diameter. The table base is available in a variety of steel finishes.
